Latex paint
is NOT hazardous waste.
Dispose of it with your household trash.

HOW TO PROPERLY DISPOSE OF LATEX (WATER-BASED) PAINT :

1) Make sure the paint can is 1/2 full or less. If the can is more than 1/2 full, pour excess into another container such as a milk jug or coffee can.

2) Add clay-based kitty litter or Speedy Dry so that the can is 3/4 full.

3) Stir the paint/kitty litter or Speedy Dry mixture.

4) If liquid paint remains, add more kitty litter or Speedy Dry and stir.

5) Allow the paint/kitty litter or Speedy Dry mixture to dry until it is no longer pourable.

6) Replace paint can lid and dispose of the paint can with your household trash.

REDUCE/REUSE:
Buy only the amount of paint you need and avoid any excess. When you can, contact a non-profit organization, religious or youth group to donate the left-over paint to a local project or program.

DON'T pour hazardous products down storm drains. It goes directly into our rivers, streams, and other natural water resources - not to a water treatment plan.

HOW TO PROPERLY DISPOSE OF OIL-BASED PAINT:
Oil-based paint is flammable material. It must be disposed of at a Household Hazardous Waste Day event sponsored by the Cumberland County Improvement Authority. For more information, please call 856.825.3700, visit www.ccia-net.com or contact your municipal recycling coordinator/convenience center.
