

The City of Millville New Jersey Leaf Season Information

Leaf season begins on November 1 and ends December 31 of each year. This is the only time that loose leaves may be raked to the edge of the street for collection. Grass clippings may be mixed with leaves, but please do not intermix any trash or brush. There will be no brush pickup during leaf season. Once the entire route is completed, it will be repeated as necessary. The specific times and locations for leaf pickup will vary based upon the volume of leaves encountered and the workload requirements for city forces. Please be patient as we make our rounds, we will get to everyone. Residents are strongly encouraged to put their leaves out loose and not bag whenever possible. This will help to make our operations more efficient by minimizing the necessity for a second labor crew to pick up bags. Your cooperation with this is greatly appreciated. There will also be a loose leaf collection during the month of April as well.

The route starts on the East side of town to center city then into South Millville. It continues to the 3rd ward then out the right hand side of Route 49 toward Bridgeton. We then come back in the other side of Route 49 toward Millville and head out Carmel Road. We then come back in Carmel Road and go out the right hand side of Fairton Road and back in the other side into the 5th ward. The route then continues out the left hand side of Cedar Street/Cedarville Road and back in at which point we head into Whitemarsh, Cedarwood Village, Lloyd Terrace, Esibill Avenue and Carlton Avenue area. The Route then heads south to Laurel Lake. Laurel Lake is the end of the route. Unfortunately there is no set day or time we will be in a certain area. We run the route continuously which usually averages three (3) passes. With the exception of the month of April which consist of one (1) pass.

Residents can call Streets & Roads @ 856-825-7000, Ext. 7388 to find out our current location during these collection months.
